Education

University of Maryland, College Park

M.S. Applied Machine Learning (September 2025 – May 2027) [GPA: 3.8]

- Advanced Machine Learning
- Principles of Data Science
- Optimization for Machine Learning
- Cloud Computing

B.S. Computer Science (September 2022 – May 2025) [GPA: 3.6]

- Machine Learning Methods for Genomics Data
- Introduction to Data Science
- Introduction to Machine Learning
- Design and Analysis of Computer Algorithms

Projects {*GitHub Portfolio: https://evankennedy-52.github.io/*}

Pipeline for a Regionally Curated Varroa Infestations Predictor (2026) [*Individual*]

- End-to-end containerized pipeline for building & deploying a varroa infestation predictor
- Designed to isolate a climatic region during training, for more efficient convergence

Building a Management Aid for Small Farms (2025) [*Individual*]

- Guiding an amateur manager through leveraging basic ML for data-driven insights

Corn Yields and Sustainable Growing Methods (2024) [*Individual*]

- Leveraged the high-explainability of linear models to analytically evaluate the effects of input variance on corn yields, with a particular focus on non-numeric features

RUL Prediction as an Optimization Problem (2026) [*Group*]

- Defining and analytically solving RUL projection as a formal optimization problem

Work Experience

Athletics Coordinator, Food Recovery Network (February 2025 - Present) [*15-20 hours/week*]

- Organized logistics and permissions for volunteer operations in university stadiums
- Lead volunteers through food recovery operations (~5-10 volunteers / event)
- Managed inventory to handle excess concessions from athletic events (~500 lbs / event)

Technical Skills

Programming Languages:

- Python
- R
- C
- Java
- C#
- Rust

Tools & Libraries:

- Git
- Linux
- Docker
- Pandas
- SQL
- AWS
